## Partnering to Build a Better World

## CH2M HILL's support

CH2M HILL has been a corporate partner of EWB-USA since 2003. It is a collaborative partnership that goes beyond financial support to include involvement on the EWB-USA board of directors; in-kind marketing and communications services; project and chapter volunteers; and sponsorship and involvement in EWB-USA's annual international conference.

CH2M HILL employees across the United States are actively involved in local chapters—planning, overseeing, and implementing projects ranging from installing solar-powered water pumps at a Guatemalan orphanage and providing bore wells for clean drinking water in India, to building bridges in Guatemala and improving drainage in a Bolivian village. In 2006, the CH2M HILL Foundation established a grant program that allows CH2M HILL employees working on EWB-USA projects to request funding to help offset project-related expenses. During the first year, the CH2M HILL Foundation awarded nearly \$30,000 to EWB-USA projects supported by employees. To remain connected, EWB-USA employee volunteers participate in monthly conference calls, enabling them to stay abreast of the latest EWB-USA activities and to share their experiences and lessons learned.

CH2M HILL is proud to partner with Engineers Without Borders–USA (EWB-USA), a non-profit organization devoted to building a better world. EWB-USA partners with developing communities and engineering students and professionals to improve quality of life through the design and construction of sustainable infrastructure.

## Shared values

CH2M HILL supports EWB-USA because we share common values and a commitment to:

- Deliver sustainable solutions
- Inspire and mentor a future workforce
- Give back to the global community
- Use engineering principles and technology to improve quality of life

Supporting sustainable infrastructure development as well as providing mentoring and service learning opportunities for college engineering students are aspirations that CH2M HILL employees take to heart. A number of CH2M HILL professionals are involved in EWB-USA and share their dedication and expertise with student and professional chapters across the country. Employees have helped implement projects in countries such as India, El Salvador, Thailand and Tanzania, among others, and our network of dedicated volunteer professionals continues to grow.

*“Young engineers thrive by taking on leadership roles that teach them project management from the ground up. Needless to say, this energy is valuable to EWB-USA; it is also a huge professional advantage for a young engineer, and supervisors at CH2M HILL recognize it.”*

— Jessica K., Civil Engineer  
Chicago

*“EWB-USA allows me to pursue two important ambitions: work on third world water improvement projects at the village level and mentor young professionals in the field. The CH2M HILL EWB-USA [professional network] is a great source of support and good ideas.”*

— Pete S., Senior Hydrologist  
Seattle

*“As a [former] Peace Corps volunteer, I was looking for a company with whom I could develop my engineering skills but was also socially conscious. CH2M HILL was a perfect fit. In addition to working on challenging water and wastewater projects, they have provided me the opportunity to keep volunteering and working in the developing world through their relationship with EWB-USA.”*

— Brock E., Staff Engineer  
Washington, D.C.

*“EWB-USA has reminded me why I became a civil engineer. I wanted to build things that would make life easier for others. EWB-USA gives me a great avenue to do just that.”*

— Mike P., Program Manager  
Milwaukee

*“Working with other CH2M HILL employees who are also involved with EWB-USA has provided a networking experience that is fulfilling and unique. It’s interesting to meet others from around the country with very different technical backgrounds, but with the same goal of working with developing communities for appropriate water/wastewater/infrastructure solutions.”*

— Greta Z., PhD, Associate Engineer  
New Orleans

## Opportunities to build a better world await you

Invest in your future while continuing your passion for EWB-USA and working for a firm that designs and builds some of the industry's most challenging projects. At CH2M HILL, your talents are encouraged, your dedication rewarded, and your unique contributions appreciated. CH2M HILL mentors, trains, supports, and empowers employees as they strive to excel in their fields.
