Who We Are

CH2M HILL is a global leader in full-service consulting, design, design-build, operations, and program management services for government, civil, industrial, and energy clients. Our work supports project goals for public and private clients and improves quality of life.

Established in 1946 by three engineers and a professor, CH2M HILL operated from the beginning on four values: take care of clients, deliver great work, do right by employees, and stay true to our integrity and honesty.

CH2M HILL has the technical talent, depth and breadth of expertise across disciplines, and global reach with local presence, to assist clients large or small in all sectors with a full suite of safe, sustainable, and innovative solutions enabling them to meet the challenges of today, and tomorrow.

CH2M HILL is currently managing some of the world's most complex and significant programs, including the Panama Canal Expansion Program, infrastructure and facilities for the London 2012 Olympic and Paralympic Games, the relocation of U.S. military forces in South Korea, and major sewerage upgrades in London and Abu Dhabi. In addition we support projects in our local communities, providing clean drinking water, efficient transportation, lean production facilities, environmental remediation, and safe energy that provide economic benefits to the community.

Extraordinary projects

- Darling Downs combined-cycle power station in Queensland, Australia
- First offshore development on North Slope in Prudhoe Bay, Alaska
- Safe, environmental cleanup of Hanford nuclear site in Washington state
- Water recycling in Australia, desalination in the Middle East, and natural and state-of-the-art treatment in Colorado

Diverse business portfolio

We help our clients build a better and more sustainable world in the areas of:

Energy - Environmental - Facilities - Resources - Transportation - Water
