Engineering and Construction Management Partnership

CH2M HILL entered into an engineering and construction management partnership with Anheuser-Busch in 1993. Our value-added approach begins with our involvement in the early stages of project conception, justification, and scoping, through project start-up. Services have included project planning, value engineering analysis, detailed process and packaging design, programming, and construction management.

A few customer benefits include:

- Increased production efficiency
- Reduced capital cost
- Compressed construction schedule
- Reduced time to market

CH2M HILL has provided services to Anheuser-Busch on the following projects:

- Modernization to increase operating efficiency from initial brewing to final packaging at Jacksonville, Florida and Williamsburg, Virginia.
- Master utilities upgrade including a cogeneration unit at Newark, New Jersey.
- Bio-energy recovery facilities at Newark, New Jersey; Los Angeles, California; and St. Louis, Missouri.
- Continuing PLC and Factory Link support at Jacksonville, Florida; Newark, New Jersey; and Cartersville, Georgia.
