

## Transportation

### Client:

Confidential Client

### Project Location:

Cobre Panama, Minera Panama

## Inmet Port Planning and Development

Minera de Panama is a grass roots copper mine located in the Panama rain forest. Key elements of the site include the mine, a 300MW coal fired power plant, and a new port facility for ocean going vessels and coast-wise trade vessels.

CH2M HILL has served as owner's representative to date, and has assisted the client in selection of EPC contractors for various elements of the project. In that capacity, CH2M HILL assisted the client with pre-qualification of EPC contractors, provided project promotion and contractor integration services to develop interest amongst a set of contractors, and designed and implemented a contractor selection process.

CH2M HILL assisted the client in development of bid documents for EPC project delivery for each of the project elements, including: the power plant, the high voltage electrical transmission facilities, the port facilities, as well as the mining facilities. The bid documents were prepared utilizing a multi-disciplinary team of professionals with experience ranging from port development, power plant design and construction, bulk coal handling expertise, waterfront development expertise, as well as mining expertise.

Interview processes included client visits at EPC proponent's headquarters and project delivery offices. A comprehensive checklist of remote project delivery requirements was developed, and compared with proven capacity to deliver. CH2M HILL's experience in remote project delivery was used as a benchmark for assessing proponent capabilities.

CH2M HILL successfully assisted the client in making a qualified EPC contractor selection, provided technical and commercial expertise in support of negotiations, and assisted in finalizing contract documents.

### About CH2M HILL

Headquartered near Denver, Colorado, USA, employee-owned CH2M HILL is a global leader in consulting, design, design-build, operations, and program management for government, civil, industrial and energy clients.
