Capital Improvements

Project Highlights

- Program management for the capital improvements and expansion program
- Participating in the expansion, construction and upgrading of airport facilities
- Coordinating more than 20 subconsultants

Project Description

A CH2M HILL team is leading the program management efforts for the Port of Seattle's capital program at Sea-Tac. The program will take 10 years to complete, is one of the largest airport development programs in the country.

The team's role is to guide the program to successful completion in 2007 by augmenting the Port's staff and leading many of the principal activities.

Significant elements of the program include:

- Expanding the south terminal and developing a new aviation terminal in the north area
- Constructing a third runway project requiring over 20 million cubic yards of fill
- Upgrading the facility infrastructure
- Constructing a large parking garage addition
- Building a transit station, rental car facility, and hotel

To meet the client's requirement for substantial involvement by local firms, our team has more than 20 committed subconsultants.
