

CH2MHILL

Just the Facts

As a global leader in full-service engineering, procurement, construction, and operations, CH2M HILL delivers innovative, practical, sustainable solutions to help our clients develop and manage the facilities and infrastructure that enhance quality of life. For more than 60 years, our business has always been about taking care of clients, delivering great work, doing right by employees, and staying true to our basic beliefs:

- Clients should have the most attentive and knowledgeable service possible.
- Those who serve clients must have a strong professional and personal interest in their success.
- Projects producing the best results for clients are valuable for all involved.
- Safe travel, a healthy environment, efficient manufacturing, and clean water are important parts of a better world.

These beliefs led CH2M HILL to become the forward-thinking group of 24,000 professionals we are today, dedicated to helping clients overcome limitations and achieve that better world.

Breaking Barriers to Progress

Every client demands and deserves a completely satisfying solution on every project, regardless of complexity. We differentiate ourselves on how we define “satisfying.”

CH2M HILL is not content with solutions that represent conventional thinking, meet only basic expectations, achieve mediocre results, and rank us in industry averages.

Look inside to discover how CH2M HILL is delivering limitless solutions for our clients, in our industry, and with our integrated services.

■ **Civil**

■ **Industrial**

For our clients:
Exceeding expectations in what matters most

Committed to
Sustainable Solutions

**Nike Footwear Factory,
Vietnam**

CH2M HILL provided programming, architectural and site design, sustainability analysis, and modeling services for this 101,200-square-foot footwear facility to be an exemplary Asian model of environmentally responsible manufacturing.

Safety Always, Everywhere

**The Voluntary Protection
Program (VPP) Award, an
OSHA Cooperative Program**

Our safety performance has earned us the highest recognition for safety: nine OSHA VPP Star awards in the last 8 years, signifying exemplary occupational safety and health programs at our job sites.

"The people of the Republic of Indonesia wish to again express its gratitude to this team and hope that their dedication serves as an example to all."

—Alwi Shihab
Coordinating Minister
for People's Welfare
Republic of Indonesia

Community Partnership
in Earnest

Tsunami Relief, Indonesia

When a devastating series of tsunamis struck several countries along the Indian Ocean coastline in 2004, CH2M HILL contributed the services of water professionals pro bono for 4 months. The team operated and maintained a mobile water treatment unit, distributed water, and trained local operators to continue the operation. CH2M HILL is continuing to support tsunami reconstruction through USAID.

Impacting a World Economy

**Public Utilities Board,
Singapore**

Innovation and strong teaming partnerships are enabling CH2M HILL to help meet the water needs of Singapore's 4.3 million residents for the next 100 years through the design and construction of the Deep Tunnel Sewerage System and Changi Water Reclamation Plant. We are meeting this challenge while improving water quality, providing a healthier environment, and preserving scarce land.

Trends to Grow On

**Starbucks Climate Inventory,
Worldwide**

CH2M HILL contracted with Starbucks Coffee Company to inventory the greenhouse gas emissions from its global operations, which include roasting plants, regional offices, retail stores, and distribution network. The results were used to identify emission-reduction opportunities and prepare for future regulations.

Innovation for Results

**Imperial Irrigation
District (IID) Water
Conservation Program,
Salton Sea, California**

This program implements GIS-based simulation modeling on 15 projects designed to conserve water in IID's water delivery system and on farms. When complete, the program should conserve 106,000 acre-feet of irrigation annually.

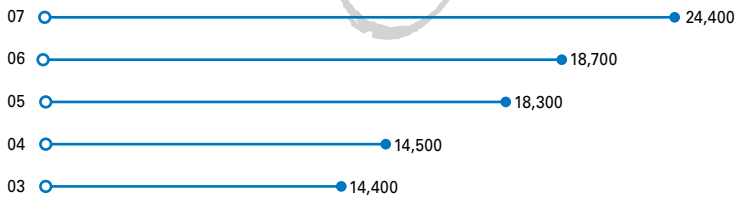

Global Project Delivery

CH2M HILL follows our clients by establishing project offices and delivery centers around the globe. This strategy makes us strong enough to standardize processes for consistent quality, yet flexible enough to localize with in-country partners and be next door to the project.

In our industry:
Exhibiting leadership by the numbers

Moving Forward

Our vision is to be the global leader in every market in which we participate. That means we will be as big, as smart, and as diverse as our clients require to keep doing what we do best: providing comprehensive solutions that meet their goals and exceed their expectations.

No one can predict how different our world will be in years to come, but whatever the future holds, we are determined to be in step with it. Along the way, CH2M HILL cultivates the following core values for which we wish to be recognized:

- Upholding honesty, integrity, and trust
- Partnering with communities
- Embracing diversity and work-life balance
- Promoting environmental stewardship
- Encouraging a collaborative and stimulating work environment
