

FOR IMMEDIATE RELEASE**CH2M HILL Wastewater Technologist to Discuss Fast Track Indirect Potable Reuse Challenges and Opportunities**

SINGAPORE, 22 June, 2009 – Technologist Rory Morgan, a project technologist with CH2M HILL, a global full-service engineering, procurement, construction, and operations firm, will address attendees of Singapore International Water Week to discuss “Indirect Potable Reuse on the Fast Track.”

With more than 12 years of experience in the design for water and wastewater treatment facilities worldwide, Morgan will discuss the challenges and opportunities for indirect potable reuse, relating experiences from the Luggage Point AWTP where he has been stationed for the last 2 years.

Morgan is the onsite process engineer and facility lead for the microfiltration and UV/advanced oxidation components of the Luggage Point Advanced Water Treatment Plant in Brisbane, Australia. He also served as a process engineer for the membrane bioreactor facility that was part of the Gippsland Water Factory, a landmark project in water recycling in eastern Victoria, Australia.

The Western Corridor Recycled Water (WCRW) Project is the largest recycled water scheme to be constructed in Australia and will be the largest project of its kind in the southern hemisphere. One of a number of drought relief initiatives of the Queensland Government, the WCRW Project will involve building pipelines from six wastewater treatment plants in Brisbane and Ipswich to three advanced water treatment plants for treatment, before being transferred to end users. The recently completed Luggage Point Advanced Wastewater Treatment Plant is able to contribute up to 70 ML/d of product water to the overall project, and was designed and constructed on a fast-track basis. The process train comprises flocculation/clarification, microfiltration, reverse osmosis and ultraviolet advanced oxidation to produce potable quality water, which is currently supplied to the regions power stations, but ultimately is able to be delivered to the regions water reservoirs.

To arrange an interview with Morgan, contact Lori Irvine at +1.720.286.3137 or Lori.Irvine@ch2m.com or Ashley Ling at +65 6391 0350 or Ashley.Ling@ch2m.com.

Headquartered near Denver, Colo., employee-owned CH2M HILL is a global leader in engineering, procurement, construction, management and operations for government, civil, industrial and energy clients. With \$6.4 billion in revenue and more than 25,000 employees, CH2M HILL is an industry-leading program management, construction management and design firm, as ranked by Engineering News-Record (2008). The firm's work is concentrated in the areas of energy, water, transportation, environmental, nuclear and industrial facilities. The firm has long been recognized as a most-admired company and leading employer, including being named by FORTUNE as one of the 100 Best Companies to Work For (2009). Visit www.ch2mhill.com.
