

**FOR IMMEDIATE RELEASE****CH2M HILL Senior Vice President to Discuss Managing Water Infrastructure and Trends in Wastewater Treatment**

SINGAPORE, 24 June, 2009 – Glen Daigger, Senior Vice President and Chief Technology Officer with CH2M HILL, a global full-service engineering, procurement, construction, and operations firm, will provide an “Overview on Managing Water Infrastructure” as well as discuss “Trends in Wastewater Treatment” with attendees of Singapore International Water Week.

As the world faces the issues of ever increasing demand for new and expanded plants and communities, aging infrastructure, environmental and regulatory requirements, and the continued impact of regional droughts, knowing how to successfully manage existing and developing water and wastewater infrastructure has become a global imperative. Daigger, a recognized expert in wastewater treatment plant evaluation, troubleshooting, and process design with over 30 years experience, will discuss why the traditional “take, make, waste” approach to managing water is leading to water stress, unsustainable resource consumption, the dispersion of nutrients and financially unstable utilities. Additionally, he will share the latest trends in wastewater treatment and water infrastructure management that can solve these issues.

Daigger is responsible for wastewater process engineering on both municipal and industrial wastewater treatment projects at a global level for CH2M HILL, a company he has been with for 29 years. He is CH2M HILL’s first Technical Fellow, an honor which recognizes the leadership he provides for CH2M HILL and for the profession in the development and implementation of new wastewater treatment technology. Daigger received his doctorate and master’s degrees in environmental engineering and has authored or co-authored more than 100 technical papers, four books, and several technical manuals, continually contributing to advancing practice within the wastewater profession. Daigger will present both the afternoon of June 23 and 24, sharing his expertise with policy makers, industry leaders, and fellow experts and practitioners from around the world.

To arrange an interview with Daigger, contact Lori Irvine at +1.720.286.3137 or [Lori.Irvine@ch2m.com](mailto:Lori.Irvine@ch2m.com) or Ashley Ling at +65 6391 0350 or [Ashley.Ling@ch2m.com](mailto:Ashley.Ling@ch2m.com).

*Headquartered near Denver, Colo., employee-owned CH2M HILL is a global leader in engineering, procurement, construction, management and operations for government, civil, industrial and energy clients. With \$6.4 billion in revenue and more than 25,000 employees, CH2M HILL is an industry-leading program management, construction management and design firm, as ranked by Engineering News-Record (2008). The firm's work is concentrated in the areas of energy, water, transportation, environmental, nuclear and industrial facilities. The firm has long been recognized as a most-admired company and leading employer, including being named by FORTUNE as one of the 100 Best Companies to Work For (2009).
