CH2M HILL Establishes Global Engineering & Design Center in India Supporting Projects Worldwide

NEW DELHI, INDIA, 17 November, 2008 – CH2M HILL, a global full-service engineering, procurement, construction, and operations firm, has established a new Global Engineering & Design Center in Gurgaon, near New Delhi, India.

The CH2M HILL design center is performing work on all discipline fronts from conceptual to detail engineering. From this multi-million dollar, state-of-the art facility, experienced engineering staff are on hand to provide engineering and design to CH2M HILL projects around the globe across a variety of industries. For example, the expansion of an oilfield surface facility in Algeria is being designed using the most current 3D modeling software. “Work sharing” between the design center in India and a CH2M HILL team in Spartanburg, South Carolina, USA, allows the company to collaborate on a carbon fiber facility and cutting edge architecture such as a blast-resistant buildings and injection pad designs for energy clients in Abu Dhabi, Alaska and Calgary.

“This work sharing proposition is helping grow CH2M HILL’s global operations while also establishing a presence in India, where capital investment is increasing and Western standards are already well understood,” says Deepak Bhasin, the Managing Director leading CH2M HILL's newest center.

The Indian design center allows for 24 hour execution of workload through a collaborative rotation allowing work to move from one time zone to the next. CH2M HILL has existing design centers in Krakow, Poland and Buenos Aires, Argentina. To date in 2008, CH2M HILL’s Buenos Aires Design Center has managed more than 1 million hours for clients and projects worldwide.

“We are already seeing significant interest in the design center from a variety of sectors ranging from energy and chemicals to manufacturing and aviation that are looking for high-quality project delivery at competitive rates,” says Joseph Mathew, Operations Director for the Center.

As the New Delhi Center continues to grow, staff will take on engineering, procurement, and construction management capabilities, while continuing to provide design support to projects throughout India and worldwide.

Headquartered near Denver, Colo., employee-owned CH2M HILL is a global leader in engineering, procurement, construction, management and operations for government, civil, industrial and energy clients. With US\$5.8 billion in revenue and more than 25,000 employees, CH2M HILL is an industry-leading program management, construction management and design firm, as ranked by Engineering News-Record (2008). The firm’s work is concentrated in the areas of energy, water, transportation, environmental, nuclear and industrial facilities. The firm has long been recognized as a most-admired company and leading employer, including being named by FORTUNE as one of the 100 Best Companies to Work For and one of America’s Most Admired Companies (2008).
