Design Services for Pfizer's Pharmaceutical Facility Upgrade

Project Description

Pfizer selected CH2M HILL Lockwood Greene design services to modernize its 3 story manufacturing facility in Toluca. CH2M HILL Lockwood Greene provided:

- Preliminary design
- Detail Engineering
- Procurement services Design Services
- Contract documents
- Post contract services

Program Elements:

- Project implementation allowed for minimum interruption of existing operations and a phased approach to design/construction.
- The facility positions Pfizer to maintain its competitive advantage in that geographical market.

Features

- Neutralization pond for the Production Building and its connection to the WWT System
- Modern solid dosage manufacturing
- Improved material handling capability
- Increased product output
- Improved environment
