Microwave Networks and Systems Installation

HarrisStratex Networks is a world-class producer of point-to-point microwave equipment with over 5,000 links installed in Poland. Stratex Networks signed a contract with a Polish mobile operator for supply and installation of its new family of PDH/SDH products known as "Eclipse."

Subsequently, HarrisStratex Networks has selected CH2M HILL as a value added service partner to deliver I&C services for this project.

CH2M HILL's scope for this project covers:

- Supply all relevant installation materials
- Provide local warehousing and installation coordination
- Conduct site survey reports and line-of-sight check
- Swap old microwave links for "Eclipse" equipment
- Install new microwave links
- Provide as-built documentation and update of existing site documentation

The project covers the whole territory of Poland. The contract is a frame agreement for an indefinite period of time. As of July 2006, volume of works exceeded 200 links installed.
