## Petrobras Company Expansion

### Project Description

CH2M HILL Lockwood Greene has worked with Petrobras, the largest petroleum company in Brazil, to set up business in Argentina and open over 700 filling stations, including renovations and grass roots stations.

Petrobras is an integrated company operating in exploration, production, refining, retailing, and transportation of petroleum and its byproducts at home and abroad. It is the Brazilian national petroleum company, and is the largest petroleum company in Brazil.

CH2M HILL Lockwood Greene has partnered with Petrobras in a very aggressive project to expand operations to Argentina and establish more than 700 filling stations, including renovations and grass roots stations.

CH2M HILL Lockwood Greene has been carrying out design and construction management for numerous grass roots stations, including emblematic stations such as the one in Ezeiza, located at Argentina's largest airport, and thematic stations such as the Swiss-looking facility in Bariloche, Patagonia.
