Washington*

*Global Engineering & Design Center
India*

CH2M HILL, a global leader in full-service engineering, procurement, construction, consulting, and operations for public and private clients worldwide, has established a Global Engineering & Design Centre in Gurgaon, Haryana, to meet the challenges in India and the ASEAN region, as well as to support the firm's global initiatives.

CH2M HILL has been doing business in India for several years. Our local offices and staff are backed by a US\$6.4 billion company with over 25,000 employees in more than 77 countries. Now, with the Global Engineering & Design Centre in Gurgaon, Haryana (near New Delhi), CH2M HILL is well-positioned to deliver projects arising from India's emergence as a major economic and industrial centre.

CH2M HILL's Energy & Chemicals division, with over US\$1.0 billion in worldwide revenue, delivers solutions that span the entire energy value chain—from upstream oil & gas, pipelines, refining, and chemicals to alternative and renewable energy sources, including bioprocesses, wind, and solar. We draw from our global experience and expertise to effectively transfer technology and bring value-added approaches to your projects.

As part of our ongoing focus to provide advanced resources and personnel to our clients, CH2M HILL deploys fully integrated engineering, procurement, and construction (EPC) teams with decades of energy industry experience. Our primary commitment is to provide you with innovative solutions for safely delivering and managing your programs and projects—locally and globally.

Major services include

- Programme Management
- Conceptual, Process Studies and Preliminary Engineering
- Front-end Engineering
- Detailed Design
- Cost Estimating
- Procurement
- Construction
- Construction Management

Our Target Zero objectives

On every project we strive to add value through best-in-class performance in health and safety, environment protection, and quality. Target Zero means that every employee works to achieve Zero Injuries, Zero Adverse Impacts on the environment, and Zero Errors and Quality Omissions.

CH2M HILL's industry leadership

CH2M HILL ranked top in programme management, manufacturing, semiconductors, pipelines, wastewater treatment, and site assessment and compliance in 2008 according to *Engineering News-Record*, a McGraw-Hill publication.

ISO 9001:2000 certified

CH2M HILL India is certified to the ISO 9001:2000 Quality Management System standard.
