

Our Presence in Poland

Russian Projects Design Team Leaders

CH2M HILL is a global leader in full-service engineering, procurement, construction, and operations for public and private clients. More than 15 years of experience in Poland and over 90 professionals in Krakow, Warsaw, and Katowice demonstrate our commitment to the Polish market as well as our ability to service client needs throughout the region.

We have knowledge of local markets, industries, and regulations, and use technology transfer and project development capabilities to complete projects that meet world-class standards. Our local offices and staff are backed by a US\$6.3 billion company with over 23,500 employees serving clients in regional offices worldwide.

CH2M HILL Polska recently was ranked as one of “Best Companies to Work For” in Poland. This confirms our commitment to company values and culture.

Leveraging established relationships and joint ventures with local firms, we are positioned to provide industrial and enterprise management solutions throughout Poland. We are your single point of contact and responsibility, taking your project from concept through planning, permitting, design, construction management, and operations.
